PROFESSIONAL SUMMARY

Full Stack Software Engineer with a BCA (CGPA 7.21/10) who designs, builds, and deploys secure, responsive web applications using JavaScript, React.js, Next.js, Node.js, Express.js, and MongoDB. Delivered 8+ web applications, including MERN platforms with REST APIs, JWT authentication, role-based access control, and AI integration. Currently owns website development, deployment, and maintenance at Pospark Retail Private Limited. Strong in REST API development, Git version control, debugging, and cloud deployment on Cloudflare, Vercel and Render.

TECHNICAL SKILLS

- Languages and Frontend:** JavaScript (ES6+), React.js, Next.js, HTML5, CSS3, Tailwind CSS, Framer Motion, Responsive Web Design
- Backend and Databases:** Node.js, Express.js, MongoDB, Mongoose, RESTful APIs, MVC Architecture
- Security and Authentication:** JWT Authentication, Role-Based Access Control, bcrypt, Secure API Development
- Deployment and Tools:** Website Deployment and Maintenance, Vercel, Render, Git, GitHub, Postman, VS Code, Cross-Browser Testing, Debugging and Troubleshooting
- AI Integration:** Claude Code, OpenAI API, GROQ API, Llama-3.1-8b-Instant

PROFESSIONAL EXPERIENCE

Full Stack Software Engineer

Pospark Retail Private Limited

Aug 2026 – Present

Bengaluru, India

- Build, deploy, and maintain the company website using modern JavaScript technologies, ensuring reliable uptime and a smooth user experience.
- Develop and integrate frontend and backend features, debug production issues, and manage releases through Git and cloud deployment workflows.
- Resolve company-wide IT issues across systems, networks, and hardware and software, minimizing downtime and supporting all departments.

Full Stack Web Developer (Project-Based)

Self-Employed

Jan 2025 – Dec 2025

- Delivered responsive portfolio websites with React and Tailwind CSS, providing ongoing support and updates for 40+ recruiters and clients.
- Engineered hotel booking prototypes with advanced filtering, improving user retention by 25% through mobile-first design and cross-browser testing.
- Maintained 10+ GitHub repositories with clear documentation and issue tracking; reviewed pull requests and resolved bugs for open-source contributors.

Full Stack Development Trainee

Certified Program

Jun 2025 – Aug 2025

- Built 5+ production-ready MERN applications using reusable component architecture, reducing deployment time by 30%.
- Developed a hotel booking platform with dynamic search and real-time filtering; resolved performance issues based on user feedback.
- Secured REST APIs with JWT authentication, bcrypt password hashing, and role-based access control.

PROJECTS

AI Career Guidance Portal (Academic Project)

Full-Stack Developer | MERN, GROQ API, Llama-3.1, Vercel, Render

May 2026 – Jun 2026

- Designed and built a MERN platform with 4 AI modules for career recommendations, resume analysis, and skill gap assessment, used by 200+ test users.
- Integrated the GROQ Llama-3.1 API with a fallback mechanism so the system keeps working if the AI service is unavailable.
- Deployed on Vercel and Render, monitoring logs and resolving deployment issues to maintain high availability.

EDUCATION

Bachelor of Computer Applications (BCA)

Gauhati University

Jul 2023 – Jul 2026

Guwahati, Assam, India CGPA: 7.21/10
